LOW FLOOR

GROUND MAINTENANCE VEHICLE

The LCVT Low Floor Grounds Maintenance vehicle is the ultimate 3.5-ton transportation vehicle to deliver commercial mowers and other equipment to site.

Based around LCVT's own low floor chassis design, which was developed solely for commercial applications, the vehicle utilises the original equipment rear suspension set up of the donor cab and the chassis sleeves up inside the cab, to ensure an interface which is equal to the O.E chassis that's removed.
